Overview
The Division of Pulmonary Medicine and Critical Care is pleased to offer *Advances in Pulmonary Disease*. This event is designed for physicians, physician assistants, advanced practice providers and nurses in primary care, rheumatology and pulmonology who provide care to patients with sarcoidosis, adults with cystic fibrosis (CF) and pulmonary arterial hypertension (PAH). In addition, interventional approaches to pulmonary disease will be presented. There will be an opportunity to meet faculty and discuss practice issues during the round table discussions. Content will be case-based addressing evidence based approaches to care as well as novel treatments on the horizon.

Learning Outcomes:
- Discuss the scientific evidence and translation to practice in the care of adult pts with CF
- Describe safety and efficacy of currently available and emerging CF treatments
- Differentiate WHO group classifications to identify PAH
- Describe current approaches to diagnosis and treatment of PAH
- Discuss future trends in PAH based on evidenced based practice
- Describe the pathophysiology and epidemiology of sarcoidosis
- Examine current approaches to the diagnosis and treatment of sarcoidosis
- Discuss the future state of sarcoid management
- Identify advanced diagnostic and therapeutic approaches to common disorders such as lung lesions and pleural effusions
- Recognize current novel Interventional Pulmonology (IP) procedures that reach beyond "traditional" boundaries
- Gain an appreciation for the prevalence and presentation of interstitial lung disease (ILD)
- Distinguish idiopathic pulmonary fibrosis (IPF) from other forms of ILD
- Develop an understanding of the course and prognosis of IPF
- Identify potentially harmful and helpful therapies for IPF
